Come join fellow hikers to discover the only true sandhill within Brooker Creek Preserve. At this time of year, the site will be flush with wildflowers. The hike is led by Dr. Craig Huegel who is well versed in local plants and animals. This hike is located off-site of typical Brooker Creek Preserve hikes, and everyone **MUST** register first in order to obtain a location map for parking. The hike is capped at 20 people. The hike occurs rain or shine. The hike is less than two miles in length with many stops. Participants must wear long pants and close-toed shoes. This hike is for hardy hikers only.
