

Back to Earth ~

What Life in Space Taught Me About Our Home Planet -
And Our Mission to Protect It

Saturday, February 25, 2023 10:30 am
Brooker Creek Preserve Auditorium

With Astronaut Nicole Stott

Nicole Stott is an astronaut, aquanaut, artist, mom, and author. When she first saw Earth from space, she realized how interconnected we are and knew she had to help protect our planetary home. She knows we can overcome differences to address global issues, because she saw this every day on the International Space Station. Stott shares stories from her spaceflight and insights from scientists, activists, and change makers working to solve our greatest environmental challenges. She is a veteran NASA Astronaut with two spaceflights and 104 days on both the International Space Station (ISS) and the Space Shuttle. She grew up in Clearwater and has personally witnessed the many changes of this area.

Nicole Stott will hold a book signing and autograph session at the event.

FREE - RSVP for the event here:
